#### What will the investment cost?

#### **Indicative Initial Offer**

## \$19,300 to \$20,500 for a 200-share holding

An indicative Offer of \$19,300 represents an 6.5%tax paid compounded return per annum while an indicative Offer of \$20,500 represents a 6%tax paid compounded return per annum over the investment term.

These indicative Offers are for a holding of 200 shares in Kowhai Forest and represent the net present value of the Cashflow Projection set out on page 11, assuming a marginal tax rate of 33 cents in the dollar.

The indicative initial Offer calculations are provided as a basis on which prospective investors may determine the amount they wish to tender as a purchase price. Changes in the assumptions underlying the Cashflow Projection can have a material impact which may increase or decrease the return and Prospective Investors should take account of this reality when reflecting on an Offer.

The 6,600 pre-1990 New Zealand Units (NZU's) issued to and owned by the Kowhai Forest Investment are not reflected in the above calculation. These NZU's are being sold progressively to meet investment costs in lieu of Call payments.

The annual Investor Administration Fee of \$40 per Investor per investment per annum is only paid once, regardless of the number of shares held in the Kowhai Forest investment. This fee is not included in the Cashflow Projection.

### **Projected Future Payments**

Forestry investment is by nature a contributory investment where investors pay the funding required each year, in addition to the Initial Price.

Due Date	Amount
2018 to 2023	\$0 due to progressive sale of NZUs
2024 to 2031	Average of \$515 pa on 30 June each year
2032 to 2034 -	\$1,748, \$428, and \$537 on 30 June each year

On 29 September 2017, investors passed a resolution to progressively sell all NZU's at the prevailing market price to meet Calls. As a result of this decision 1,900 NZUs were sold at \$17.75 per unit for a total of \$33,725 in late 2017 and 1,100 NZUs sold on the 16 June 2018 for \$20.30 per NZU being total gross receipts of \$22,330.

To fund last year's budget, 1,000 NZUs were sold on 19 September 2019 for \$24.90 per NZU for total gross receipts of \$24,900. There are 2,600 NZUs remaining and this year's budget will also be funded by their sale.

## **Investment Profit (Tax Loss)**

Under current New Zealand tax law, any profit each year will be subject to tax at the investor's marginal tax rate. Resident Investors are entitled to a share of any tax losses and are advised of the amount in May each year. Non-residents (such as Overseas Persons, see page 5) should check with their Tax Adviser.

Partners on the Register of Partners at the end of the LP's financial year will be allocated the full year's profit or loss for tax purposes pro rata to their respective LP shares. It is important to note that allocation will have no regard to transfers during the year, so any transfer price should reflect the consequences of whether the buyer or seller has paid any Call or received any Distribution during the year of transfer.

## What is the projected return?

## **Projected Return at Harvest**

## \$63,580 gross in 2032 and 2036 for a 200-share holding

The table below shows the projected gross return at harvest for a holding of 200 shares in Kowhai Forest at current log prices and if log prices increase or decrease by 10%

Year ending	Current Log Prices -10%	Current Log Prices	Current Log Prices +10%
2032	\$20,817	\$28,851	\$36,885
2036	\$27,379	\$34,729	\$42,078
Total	\$48,196	\$63,580	\$78,963

**Please note that variations around this timing are possible**. Refer to page 8 for details on how the projected return at harvest has been calculated.

#### **Harvest Tax Issues**

Under current tax law, harvest proceeds will be paid to investors as a gross amount and investors will be responsible for paying tax at their marginal rate. The net return to investors will depend on their marginal tax rate at the time of harvest. Investors can choose to spread harvest income between the year of harvest and any one or more of the three preceding income years. In addition, investors will receive their share of the value of the land as a capital payment (non-taxable), when sold. Non-residents (such as Overseas Persons, see page 5) should check with their Tax Adviser.

As set out in the Cashflow Projection on page 11 the total projected net distribution at a tax rate of 33 cents in the dollar is \$41,494 for a holding of 200 shares.

## **Selling the Investment Before Harvest**

Shares can be sold at any time before harvest, but the sale is deemed to be a disposal of the underlying assets (land and trees). The sale of trees is a taxable event, whereas the sale of land is not. Section HG 5 of the Income Tax Act 2007 creates a \$50,000 threshold (in any 12-month period), under which this taxation treatment does not apply.

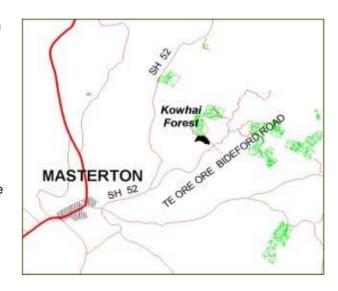

#### Where is Kowhai Forest?

#### **About Forest Enterprises**

Forest Enterprises is one of New Zealand's leading forest investment companies and is unique in providing both forest management and investment services. Our business is to create wealth naturally for private investors via New Zealand pine plantation forestry.

Our 6,500 investors are mostly New Zealanders, and on their behalf we manage a forest estate of more than 20,000 hectares in the North Island's East Coast regions of Wairarapa, Hawkes Bay and Gisborne. Forest Enterprises is also the property manager of over 10,000 hectares of FSC® certified forestry in New Zealand owned by an international institutional forestry fund.

Since we started in 1972 in Masterton, New Zealand we have remained a locally owned and operated business. We have grown to 28 employees in total —who include the company's five shareholders — professionals in the fields of forestry, accounting and finance, administration, commercial law, and sales and marketing.

Forest Enterprises is the business name for Forest Enterprises Limited (FEL), and its parent company Forest Enterprises Growth Limited (FEG). FEL is the Manager of the Kowhai Forest Investment. FEG is contracted by FEL to coordinate and supervise all the field activities relating to the land and trees, at the direction of FEL, a licenced manager of forestry managed Investment Schemes under the FMC Act.

#### The Kowhai Forest

## **Property Description**

The terrain of Kowhai Forest can be described as medium hill country with predominantly easy land and flat country around the Taueru River. The aspect is generally to the east with northerly and southerly faces. The property drains to the Mangarei Stream (north), the Ruatiki Stream (south), which both flow into the Taueru River to the east. The range in altitude is from 140 metres above sea level (asl) to a high point on the western boundary of 280 metres asl with most of the property around 220 metres asl.

#### **Climate**

The property is located in a warm valley, well sheltered from the prevailing northwest wind and has an annual rainfall of 1,125 mm. The site index, a forestry term for the indication of growth potential, has been assessed as being an average of 29.5 metres, which compares well with an average of about 28.5 metres at Kaingaroa forest in the Central North Island.

Kowhai Forest is a replanted second rotation forest. In order to harvest the first crop, an extensive roading structure was formed throughout the forest that will benefit investors as the cost to form these roads has already been met. Kowhai Forest is adjacent to other forests managed by Forest Enterprises, providing potential economies of scale for all operations

### **Forest Development Status**

Kowhai Forest comprises a net-planted area of 99.8 hectares, established in 2003, 2004, 2005, 2006, and 2009. Each shareholding of 200 shares represents 1.66 hectares of established forest on land owned by the Investors.

GF 19 genetically improved treestocks were used at a target planting density of 1,000 stems per hectare. Pruning and thinning was undertaken to achieve the maximum volume of clearwood (knot-free wood) at harvest, coupled with good tree size and restriction of branch size in the unpruned zone (above 6.5 metres).

Planting year	Net Stocked Area
2003	23.4 hectares
2004	17.7 hectares
2005	11.8 hectares
2006	6.6 hectares
2009	40.3 hectares
Total	99.8 hectares

Areas are based upon mapping completed in April 2015, updated in 2017. Mapping accuracy is + or -3.0%. Updated photography and mapping is undertaken during the life of a forest and it is usual for the measured net stocked area to change with each update and the changes can be material.

#### Insurance

Kowhai Forest is insured until harvest under a special purpose forest insurance scheme, designed to cover key forest risks, including losses from fire, wind, volcanic eruption plus re-establishment, infrastructure replacement and claim preparation costs. There is a policy excess of \$225,000.

## Manager's Report

The Managers Report summarises forest activity for the previous and coming year plus other material management issues and is included in the Financial Report. Relevant extracts from the latest Manager's Report for Kowhai Forest are included on page 9.

## How has the projected return at harvest been calculated?

Taken from the Financial Report for the year ended 31 March 2020.

### **Net Stumpage**

The return at harvest is expressed as the net stumpage per hectare. For Kowhai Forest this is currently projected to be \$35,354 per hectare (ha) calculated as follows —

Log Type	Projected Recoverable Volume (m³/ha)	Percentage	FE Price at Point of Sale (\$/m³)	Total Production Costs (\$/m³)	Net Return Stumpage (\$/m³)	Contribution to Stumpage (\$/ ha)
Export						
P40	80.3	11%	\$183.40	\$84.37	\$99.03	\$7,948
P35	39.6	6%	\$175.35	\$83.21	\$92.14	\$3,648
Α	268.4	38%	\$133.65	\$84.37	\$49.28	\$13,225
K	66.7	9%	\$118.20	\$84.37	\$33.83	\$2,256
KI	53.2	8%	\$111.60	\$84.37	\$27.23	\$1,449
KIS	51.7	7%	\$96.10	\$84.37	\$11.73	\$607
Domestic	Domestic					
S30	65.2	9%	\$121.25	\$69.66	\$51.59	\$3,362
S20	78.2	11%	\$106.25	\$69.66	\$36.59	\$2,861
Totals	703.1	100%				\$35,354

### **Harvest Assumptions**

The calculated harvest return is a projection based upon a number of critical assumptions —

- A sales scenario based on Masterton and the Port of Wellington as the point-of-sale has been used and therefore assumes demand will exist at harvest time at this destination. Other scenarios will produce different stumpage outcomes.
- Once the Partnership's harvest is budgeted to commence within 12 months of reporting date, the Forest Valuation for this 12 month period will be based on Forest Enterprises' 12 month average log prices prior to reporting date. The Forest Valuation post this 12 month period following reporting date will be based on Forest Enterprises' 36 month average log prices prior to reporting date. This change in assumption has no impact on the Forest Valuation as this Partnership is not budgeted to commence harvest within 12 months of reporting date.
- Harvesting and Transportation costs are based upon the costs currently being paid by Forest
  Enterprises for current harvesting. These costs reflect the characteristics of the forests currently
  being harvested, which may differ from the characteristics of this forest when it is harvested.
  The financial impact of the relevant characteristics of this forest are unable to be quantified at
  this time.
- The cost of the roading network required at harvest is substantial. An estimate has been made and represents \$6.00/ m3 of the Total Production Costs (\$/ m3) figure shown in the Stumpage calculation above.
- Harvest is assumed to occur in the years shown. Harvesting practicalities will probably have an impact on this timing.

#### **Important**

Every effort has been made to arrive at reasonable figures based upon Forest Enterprises 48 years forestry knowledge, including our current harvesting experience. Investors should be aware that the projections provided will vary over time depending upon many factors and the resulting changes could be material.

## Manager's Report for Kowhai Forest

Taken from the Financial Report for the year ended 31 March 2020.

## Forest Activity for the Year

The LiDAR (light detection and ranging) mapping program commenced.

### **Forest Activity for the Coming Year**

Provision has been made in the budget for the continued maintenance of the tracks and internal access ways, as required in 2020.

## **Change in Discount Rate for the Treecrop Valuation in the Financial Statements**

The auditors have reviewed the discount rate we apply to the Treecrop valuation and consider that the pre-tax 10% discount rate previously used is higher than current industry practice. In light of this, the rate has been changed to 8% We have implemented this new rate and this has the impact of increasing the Treecrop valuation in the Financial Statements.

The discount rate applied to your Investment Valuation of individual share parcels remains at 6%post tax.

#### Insurance

The insurance policy for your forest investment was up for renewal on 31 August 2019. As is prudent, we obtained quotes from multiple providers. Having considered the various policies available, we have remained with our existing provider. Insurance Facilitators Pty Ltd, an Australian based specialist forestry and crop insurance provider, and underwritten by SJ Catlin & Others Syndicate 2003 at Lloyd's with a Standard & Poors rating of A+(Strong).

There has been a change to the policy. The excess has increased from a maximum of \$25,000 to 0.75% of the Sum Insured of each Forest Location with Area Damage, subject to a minimum of \$5,000 and maximum \$225,000 in every Single Cause.

To keep the excess at a maximum of \$25,000, the alternative quotes we obtained were more than 3 times the premium and there would have been less cover for wind. Cover terms of the alternative policies were also far less favourable.

#### Conclusion

This report is specific to matters pertaining to your forest, with items of a more general nature, and industry comment being covered in our regular Forest Enterprises Investor Communications.

## **General Notes to the Cashflow Projection**

The base Cashflow Projection is updated yearly as part of the financial reporting process with the first year's expenditure being the budget for the current year. Regular changes are made to the harvest revenue projection between Financial Reports in accordance with the harvest assumptions on page 8. Generally, changes between reporting periods are only made if separately identifiable and material or to reflect their timing relative to the date of the Investment Report.

The Cashflow Projection reflects our estimate of the cost of the work to be done or services provided, year-by-year through to harvest, generally based upon the work program and prices current at the time of the Financial Report review. Actual costs and timing will vary from the projections as a consequence of changes over time to the work program and the prices; these changes may be material.

Other assumptions (in addition to the harvest assumptions set out on page 8) include —

- It is assumed that the land will be sold in the final harvest year at the current rating valuation.
- No provision is made for the replanting of the areas harvested, other than for trees on the property at the time of purchase. Practically this will occur the winter following harvest and the replanted tree crop sold at the conclusion of harvest (in addition to the land). This will impact upon the timing of the distribution of the harvest revenue.
- The Cashflow opposite does not include the annual Investor Administration Fee of \$40.

NOTE: Future Calls in the Cashflow Projection should be taken as a guide only. **Due to harvest** practicalities, it is likely that Distributions will be spread over several years.

- 3. The Assignee(s) wish to grant to Trustees Executors Limited the limited Powers of Attorney which are a condition in the Governing Documents of being a limited partner in the Limited Partnership, and a condition in the Constitution of being a shareholder in the General Partner.

#### **Specific Terms**

- 4. **Tax Treatment if Standing Timber Consideration is >\$50,000:** The Assignor confirms that the consideration paid by the Assignee under this Deed is taxable income because the safe harbour under section HG 5 of the Income Tax Act 2007 does not apply. Therefore, the Assignee is entitled to a 'cost of timber' deduction in terms of section DP 10 of the Income Tax Act. The Assignor and Assignee agree that:
  - 4.1 The Assignor will obtain from the Manager details of the value of the standing timber component of this assignment.
  - 4.2 The Assignor will meet the resulting taxation liability.

  - 4.4 In the event that IRD determines a different value of the standing timber component of this assignment to that obtained from the Manager, the Assignor will provide a copy of IRD's determination to the Manager who will then advise the Assignee of the amended quantum of the 'cost of timber'.
- 5. **Tax Treatment if Standing Timber Consideration < \$50,000:** The Assignor confirms that the consideration paid by the Assignee under this Deed is excluded income under section HG 5 of the Income Tax Act 2007 and therefore the Assignee is not entitled to a 'cost of timber' deduction in terms of section DP 10 of the Income Tax Act. The Assignee acknowledges this taxation status of the assignment.
- 6. IRD Determination: In the event that the New Zealand Inland Revenue Department ("IRD") determines otherwise:
  - 6.1 The Assignor will advise the Manager of the change in status of this transaction and obtain from the Manager details of the value of the standing timber component of this assignment.
  - 6.2 The Assignor will meet the resulting taxation liability.
  - 6.3 The Assignee will be entitled to a 'cost of timber' of the standing timber component of this transaction without additional payment to the Assignor. The Manager will advise the Assignee the quantum of the Assignee's 'cost of timber' entitlement which will be the value of the standing timber component of this assignment advised to the Assignor by the Manager.
  - 6.4 In the event that IRD determines a different value of the standing timber component of this assignment to that obtained from the Manager, the Assignor will provide a copy of IRD's determination to the Manager who will then advise the Assignee of the amended quantum of the 'cost of timber".
